# Combating Antisemitism in the Workplace

**There has been an alarming increase in antisemitism in the United States.** Those who engage in anti-Jewish prejudice outside of work are not likely to check their discrimination at the workplace door.

This webinar will discuss modern-day antisemitism and steps employers can take to prevent and remedy discrimination against and harassment of Jewish employees. The webinar will also address the importance of creating a sense of belonging for Jewish employees in Diversity, Equity, and Inclusion (DEI) programs.

Combating antisemitism in the workplace is not only about minimizing an employer's exposure to legal liability. It is also about creating a respectful and productive workplace culture.
